APPLICATION OF BRYDELS COMMUNICATIONS, LLC

Brydels Communications, LLC ("Brydels" or "Applicant"), pursuant to S.C. Code Ann. § 58-9-280 and Section 253 of the Telecommunications Act of 1996, 47 U.S.C. §253 (1996), respectfully submits this application for Authority to Provide Resold Interexchange and Local Exchange Telecommunications Services, for flexible rate structure for local exchange service offerings similar to that approved by Order No. 98-165 in Docket No. 97-467-C, and for alternative regulation for its interexchange services in accordance with the principles and procedures established in Orders No. 95-1734 and 96-55 in Docket No. 95-661-C, and as modified by Order No. 2001-997 in Docket No. 2000-407-C.

Applicant proposes to offer prepaid and postpaid resold interexchange and local exchange services, to residential and business customers throughout the geographic service territory of BellSouth. Should its Application be granted, Applicant plans to commence offering service immediately upon the execution of the appropriate and necessary interconnection agreement(s) with the appropriate Incumbent Local Exchange Carriers ("ILECs"). Approval of this Application will be beneficial to the public interest by increasing the level of competition in the South Carolina telecommunications market. Ultimately, competition will compel all

telecommunications service providers to operate more efficiently and pass on the resultant cost savings to consumers. In addition, as a result of competition, the overall quality of local telephone services will improve.

II. **Description of the Applicant**

1. **General Information**

a. Brydels is a telecommunications company that has been organized to provide competitive interexchange and local exchange services to residential and business customers. The Company is headquartered in Baton Rouge, Louisiana and its Customer Service Department is located there.

b. The Company is currently providing telecommunications services in the state of Kentucky, but is in the process of applying for authority in twelve additional states. Local exchange services will be offered throughout the BellSouth geographic service territory, and Brydels has commenced negotiating the necessary agreements with BellSouth. The Company will offer services as a reseller. Local exchange services will not be provided to customers located in any South Carolina rural incumbent's local exchange service areas. Attached as Exhibits F and G are the Company's proposed tariffs.

c. Brydels is a Louisiana corporation authorized to transact business in South Carolina. The Company is certified with and currently in good standing with the South Carolina Secretary of State.

2. **Customer Service**

a. Customer service representatives will be available to assist its customers during normal business hours (8:00 a.m. to 5:30 p.m. (CST) Monday through Friday). Customers can reach the Company's Customer Service Center by calling 1-877-564-7000. This toll free number will be printed on all customer billing statements. Customers wishing to communicate with customer service representatives in writing may send written correspondence to:

Brydels Communications, L.L.C.
Attn: Customer Service
549 Kenilworth Pkwy.
Baton Rouge, LA 70808

b. The Company's customer service representatives are prepared to respond to a broad range of service matters, including: (1) the types of services offered, and the rates associated with such services; (2) monthly billing statements; (3) problems or concerns pertaining to a customer's current service, and (4) general telecommunications matters.

III. **Technical, Managerial and Financial Expertise Necessary to Provide Local Exchange Service**

Brydels' management team has the requisite technical, financial and managerial experience to operate a competitive telecommunications provider. Profiles of the Company's management personnel are attached as Exhibit E. A more detailed explanation of these capabilities is as follow.

1. **Financial Qualifications**

a. The Applicant possesses adequate financial capitalization to conduct the business which it is proposing on a continuous basis. Applicant's owner, John Brydels, Jr., will guarantee the start-up operations of the Applicant.

b. In addition, the Applicant is in the process of obtaining the authority to offer resold interexchange and local exchange services in additional states, and initiation of its operations will significantly increase revenues. The Company will also strictly monitor its expenses, institute effective cost controls and keep its selling, general and administrative ("SG&A") expenses as a percentage of gross revenues equal to if not better than the industry average. Therefore, the Company intends to have successful ongoing operations in the near future.

2. **Managerial Qualifications**

The Company's management team is highly skilled, having acquired considerable experience in the telecommunications industry, as evidenced by the management profiles submitted with this application.

3. **Technical Qualifications**

a. The Company will operate as a provider of prepaid and postpaid resold and local exchange and interexchange services. The quality of service provided to customers will be equivalent to that of the ILECs and other CLEC providers, and will meet all quality of service standards. In addition, the Applicant's management team has extensive experience within the telecommunications field, including technical experience.

b. As the foregoing illustrates, the Company possesses the technical expertise necessary to successfully operate as a local exchange provider within the State of South Carolina.

IV. **Approval of Application is in the Public Interest**

1. Increased competition results in a reduction of the prices consumers pay for goods and services. When competition is introduced into markets, the consumer benefits by a way of efficient pricing, improved service quality and expanded product and service capabilities.

2. The objective of the Federal Telecommunications Act of 1996 is to foster the development of competition in the local exchange market so that consumers will be afforded the foregoing benefits. Pursuant to the Act, barriers to local service entry are prohibited and parameters for competition in local exchange markets are established. Because the Company will be able to offer a broad range of services to customers wherever the incumbent LEC(s) offer appropriate wholesale tariffs, the Company's entry into the local service market will serve to foster competition.

3. Granting this Application is consistent with S.C. Code Ann. § 58-9-280, and, in that regard Applicant makes the following representations to the Commission:

a. Applicant possesses the technical, financial, and managerial resources sufficient to provide the services requested;

b. Applicant's services will meet the service standards required by the Commission;

c. The provision of services by Applicant will not adversely impact the availability of affordable telecommunications service;

d. Applicant, to the extent it is required to do so by the Commission, will participate in the support of universally available telephone service at affordable rates; and

e. The provision of services by Applicant will not adversely impact the public interest.

4. The demands of a competitive market are a better means to achieve affordability and quality of service than a monopolistic environment. As competitors vie for market share, they will compete based upon price, innovation and customer service. Those providers that offer consumers the most cost effective products will gain market share. In contrast, providers whose products do not meet the needs of consumers will lose market share and ultimately be eliminated from the industry.

V. Description of Services Offered and Service Territory

The Company intends to offer postpaid and prepaid resold interexchange and local exchange services to residential and business customers as more specifically defined in its attached tariffs. Prior to providing services in South Carolina, the Company will file Final Tariffs with the Commission.

The Company will offer all services on a twenty-four hour per day, seven day per week basis. Local exchange services will be provided in the geographic areas served by BellSouth. Local exchange services will not be provided to customers located in a rural incumbent's local exchange service areas. Interexchange service will be offered on a statewide basis.

VI. Waivers and Regulatory Compliance

The Company requests that the Commission grant it a waiver of those regulatory requirements inapplicable to similarly situated providers of interexchange and local exchange services.

1. Financial Record-Keeping System

a. The Company requests that it be exempt from any record-keeping rules or regulations that might require a carrier to maintain its financial records in conformance with the Uniform System of Accounts ("USOA"). The USOA was developed by the FCC as a means of regulating telecommunications companies subject to rate base regulation. The Company asserts that because it utilizes GAAP, the Commission will have a reliable means by which to evaluate operations. Therefore, the Company hereby requests to be exempt from any USOA requirements of the Commission.

2. Local Exchange Directories

The Company requests that it not be required to publish local exchange directories. The Company will make arrangements with the incumbent LEC(s) whereby the names of its local exchange customers will be included in the directories published by the incumbent LEC(s). LEC directories will also be modified to include the Company's customer service number. These directories will be distributed to all local exchange customers. It would be an unnecessary burden on the Company to require that it publish and distribute its own directory to all customers located within each exchange

area, particularly since nearly all of these customers will be customers of the incumbent LECs. It is more efficient for the Company to include its limited customer list in the existing directories of the incumbent LECs.

3. Reporting Requirements

The Company further requests waivers of any reporting requirements which, although applicable to incumbent LECs, are not applicable to competitive providers such as Applicant because such requirements: (1) are not consistent with the demands of the competitive market; or (2) they constitute an undue burden on a competitive provider, thereby requiring an inefficient allocation of its limited resources. In addition, the Company reserves the right to seek any regulatory waivers which may be required for the Company to compete effectively in South Carolina local exchange services resale market.

VII. Interconnection Arrangements

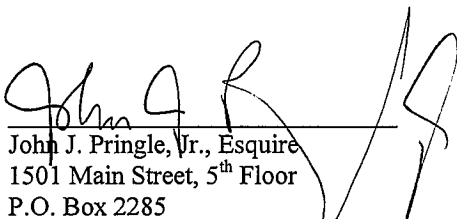

The Company will not enter into any Interconnection Agreement, as facilities-based approval is not desired at this time.

VIII. Conclusion

This Application demonstrates that the Company possesses the technical, financial and managerial resources to provide local exchange service within the State of South Carolina. Furthermore, granting this Application will promote the public interest by increasing the level of competition in the South Carolina telecommunications market. Ultimately, competition will compel all telecommunications service providers to operate more efficiently and pass the resulting costs savings on to consumers. In addition, as a result of competition, the overall quality of service will improve.

WHEREFORE, Brydels Communications, L.L.C. requests that the South Carolina Public Service Commission issue a certificate of public convenience and necessity authorizing it to provide resold local exchange intrastate telecommunications services to the public as proposed herein and set forth in the attached tariffs. Brydels Communications, L.L.C. also requests that the Commission regulate its local exchange service offerings in accordance with the principles and procedures established in Order No. 98-165 in Docket No. 97-467-C, regulate its intrastate interexchange service offerings in accordance with the principles and procedures established for alternative regulation in Orders No. 95-1734 and 96-55 in Docket No. 95-661-C, and as modified by Order No. 2001-997 in Docket No. 2000-407-C, and grant such other relief as is just and proper.

Respectfully submitted this 1st day of October, 2007.

TARIFF FORMAT

- A. Sheet Numbering - Sheet numbers appear in the upper-right corner of the sheet. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between existing sheets with whole numbers, a decimal is added. For example, a new sheet added between Sheets 14 and 15 would be Sheet 14.1.
- B. Sheet Revision Numbers - Revision numbers also appear in the upper-right corner of the sheet. These numbers are used to determine the most current sheet version on file with the Commission. For example, 4th Revised Sheet 14 cancels 3rd Revised Page 14.
- C. Paragraph Numbering Sequence - There are various levels of alphanumeric paragraph coding. Each level of coding is subservient to its next higher level of coding. For example:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a)
- D. Check Sheets - When a tariff filing is made with the Commission, an updated check sheet will accompany the filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new sheets are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc., remains the same, just new revision levels on some sheets). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current sheet on file with the Commission.

SECTION 3 - DESCRIPTION OF SERVICE AND RATES

3.1 Timing of Calls

The customer's monthly usage charges for Carrier service are based upon the total number of minutes the customer uses and service options subscribed to. Chargeable time begins when the connection is established between the calling station and the called station or PBX. Chargeable time ends when either party "hangs up."

There are no charges incurred if a call is not completed.

3.2 Start of Billing

For billing purposes, the start of service is the first day on which service is available for use by the customer. The end of service date is the last day or any portion of the last day for which service was provided to the customer.

3.3 Interconnection

Service furnished by Carrier may be interconnected with services or facilities of other authorized communications common carriers and with private systems, subject to the technical limitations established by Carrier. Service furnished by Carrier is not part of a joint undertaking with such other carriers. Any special interface equipment of Carrier and other participating carriers shall be provided at the customer's expense.

Interconnection with the facilities or services of other carriers shall be under the applicable terms and conditions of other carriers' tariffs. The customer is responsible for taking all necessary legal steps for interconnecting his customer-provided terminal equipment or communications systems with Carrier's. The customer shall secure all licenses, permits, right-of-ways, and other arrangements necessary for such interconnection.

3.4 Terminal Equipment

Carrier's service may be used with or terminated in customer provided terminal equipment or customer provided communication systems, such as teleprinters, handsets, or data sets. Such terminal equipment will be furnished and maintained at the expense of the providing customer, except as otherwise agreed in advance and in writing. The customer is responsible for all costs at their premises, including personnel, wiring, electrical power, and the like incurred in the use of Carrier's service. When such terminal equipment is used, the equipment shall comply with the generally accepted minimum protective criteria of the telecommunications industry.

3.5 Calculation of Distance

Usage charges for any mileage sensitive products are based on the airline distance between rate centers associated with the originating and terminating points of the call.

The airline mileage between rate centers is determined by applying the formula below to the vertical and horizontal coordinates associated with the rate centers involved. The company uses the rate centers and associated vertical and horizontal coordinates that are generally accepted within the telecommunications industry.

Formula:
$$\sqrt{\frac{(V1 - V2)^2 + (H1 - H2)^2}{10}}$$

3.6 Minimum Call Completion Rate

The customer can expect a call completion rate of 97% of calls attempted during peak use periods for all Feature Group D (1+) services.

3.7 Special Services

A Special Service is any service requested by the customer for which there is no prescribed rate in this tariff. Special Service charges will be developed on an individual case basis and submitted to the Commission for prior approval.

3.8.2 Inbound 8XX Service

Inbound service is virtual banded inbound toll service which permits calls to be completed at the subscriber's location without charge to the calling party. Access to the service is gained by dialing a ten digit telephone number which terminates at the customer's location. Inbound services originate via normal shared use facilities and are terminated via the customers' local exchange service access line.

Carrier will accept a prospective inbound service customer's request for up to ten (10) telephone numbers and will reserve such number(s) on a first come first serve basis. All requests for number reservations must be made in writing, dated and signed by a responsible representative of the customer. Carrier does not guarantee the availability of number(s) until assigned. The telephone number(s) so requested, if found to be available, will be reserved for and furnished to the eligible customer.

- C. Paragraph Numbering Sequence - There are various levels of paragraph coding. Each level of coding is subservient to its next higher level of coding.
 - 2.
 - 2.1.

 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
- D. Check Sheet - When a Tariff filing is made with the Commission, an updated check sheet accompanies the Tariff filing. The check sheet lists the sheets contained in the Tariff; with a cross reference to the current revision number. When new sheets are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some sheets). The Tariff user should refer to the latest check sheet to find out if a particular sheet is the most current sheet on file with the Commission.
